1 through 26	Single letters A-Z	Skip OPG and use AAS Level 1 Step 1 to introduce the first 26 phonograms
41		AAS Level 1 key card: f, l, and s are often doubled after a single vowel at the end of a one-syllable word AAS Level 3: We double the consonant to 'close' the syllable & thus 'protect' the short vowel

116	aw	
117	au	
122	oy	
123	oi	
127		The words introduced in this lesson are NOT "disobedient" words. AAS explains that 'silent e' has many jobs. One job is to keep "v" from being the last letter in a word. "English words never end in i, j, u, or v". Another is to make 'c' or 'g' soft.

193	ci, si	
201		In "sorry", the phonogram is NOT or, it is a short o with the r doubled to protect the short vowel
